Easy to Build!

All of these buildings are supplied with easy to read instructions, for the DIY market, or assembly can be arranged. Instructions give you a step by step guide and contain many detailed drawings. A compact disc is also available to show how our building teams put them together. These are available for a number of different structure styles.

It couldn't be easier!

- Our software can show you exactly what your building will look like once completed.
- Architectural drawings, and building warranty's are a problem of the past, when you purchase a **Blueriver Steel Building**.
- Choose the colours and the finish you require and the options that will make your **Blueriver Steel Building** your own.
- The building is delivered direct to your door by our suppliers, in easily manageable lengths.

Invest in a Blueriver Steel Building and protect your valuable assets.

When you think about the money we spend these days on our vehicles and our "toys", you have to seriously consider providing protection from the harsh conditions found locally. These include sun damage, hail, frost, snow and acid rain. Our buildings are an economic alternative to the costs associated with the effects of the weather.

Usual delivery time from placement of order is approximately 2-4 weeks depending on the time of year.

If you require the services of our erection team, please allow an average of 2 weeks for commencement of the assembly.

Colours in this brochure are as close as possible to the original colours. Due to the printing process these may change slightly. Please ask for a sample of the colour if in doubt or if matching is critical.

Triple Garage 9m x 5.5m x 2.4m eave

We offer a range of value for money buildings to suit most requirements in a residential situation. We only specify high quality materials manufactured to ISO 9001:2000 standard and in easily manageable packs.

Our team can give you the exact costing on the structure you require. Using our state-of-the-art software and estimating package this only takes minutes. All buildings are supplied with easy to read instructions, for the DIY market, or assembly can be arranged. Architectural drawings, and building warrants are a problem of the past, when you purchased a Blueriver Steel Building.

Garages come with a choice of an 11 Degree or 22 Degree roof pitch, a range of colours to suit any surroundings and even a choice of paint finish. We have an exterior finish to suit any purpose or surrounding. Depending on your location, and the finish selected, we can offer you a warranty of up to 25 years. A durable galvanised frame that easily bolts together ensures our structures will stand the test of time. All buildings are available in single skin, insulated twin skin or insulated composite panel. This makes our buildings suitable for any purpose you have in mind.

Blueriver is a leading supplier of Steadman's Composite panels
